## **Success in new market**

The Board of The Environmental Group Limited (ASX: EGL) is pleased to announce success in a new market for Baltec IES which has won its first off-shore project with a value of approximately three quarters of a million dollars.

The project is located in Northern Australia for an international customer in the oil & gas industry. The project includes scope for both on-shore and off-shore work in a very challenging and stringent environment and will be delivered to a tight schedule. Baltec IES's excellent reputation with over three decades of experience in the industry was a significant factor in winning this work.

This marks a successful milestone in the group's strategic plan to further expand its repair and maintenance (R&M) activities and diversify its customers portfolio.

Lynn Richardson  
Chairman  
The Environmental Group Limited
